

team OpenZIS

just the facts.

OpenZIS is a Commercial Open Source company based in the US.

We have a knack of producing beautiful, simple solutions for today's SIF applications. Be it an application, a longitudinal data system, a district reporting system, or a commercial product; we have the combined expertise to provide you with a solution that will stand out in the marketplace.

what do we do?

Where Team OpenZIS stands out in the crowd is our expertise in bringing great design to complex systems.

We've melded traditional design with modern agile development to provide our clients with simple solutions to some of the most complex client problems have to offer. Our expertise in design and strategy is matched by our ability to deliver above and beyond what is expected.
